

8 Timesheet Management

Clearly and accurately tracks the working hours of each employee for both project and non-project activities

1 Work Category & Charge Account

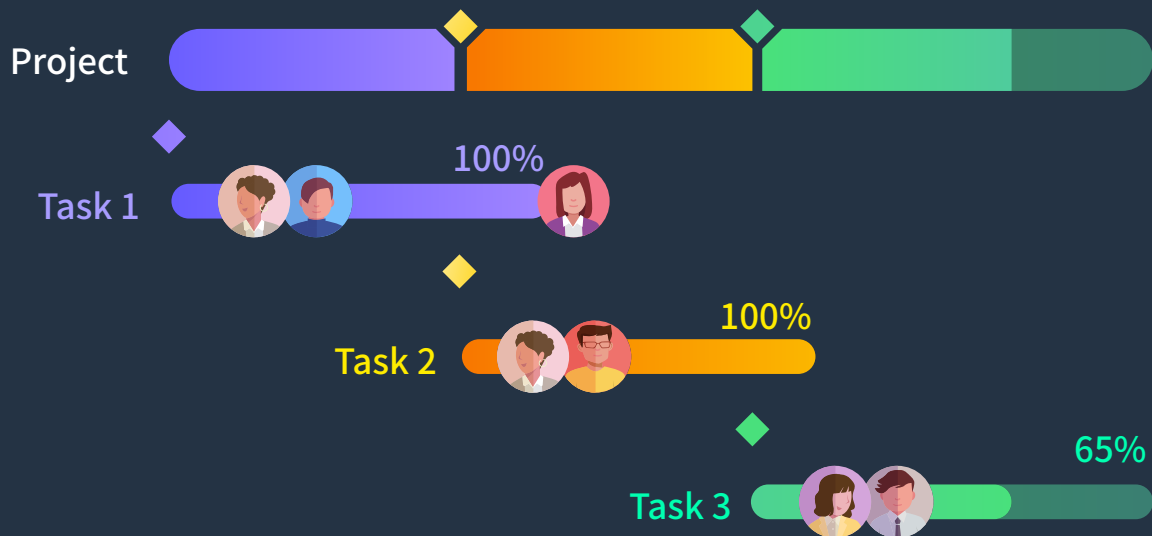

8 supports Work Category and Charge Account mechanisms to allow the enterprise to record their time spent according to its categories of work and process time charges based on its charge rates and charge accounts. The enterprise can choose using 1 or 2 levels of work categories to keep track of their employees and contractors' time, depending on the level of details that it accustom to.

8 allows the enterprise to define project work categories and non-project work categories (e.g., leave, recruitment, production support) and track time spent by category, subcategory, project, department, job level or individual. **8** is also able to track individual's idle time and utilization rate. When combining with the PM module, **8** Timesheet can further track planned efforts vs. actual efforts for each project. The detection of the discrepancy of planned vs. actual at the earliest possible time will allow the manager to take actions to improve the situation promptly.

2 Measure effort, cost, progress & speed

8 Timesheet is extraordinary important for effort, cost, progress and speed management of an organization in the following ways:

- By tracking the time of an employee on an assignment, the manager can qualify the employee for a new assignment, role and expected performance.
- By analyzing time usage of an employee, the manager can determine the employee's skills and utilize him or her in parts of a project for which he or she is better suited.
- 8 Timesheet helps in identifying areas in which an employee takes more time than allocated and needs additional training.
- 8 Timesheet is helpful in measuring the overall efficiency of your project.
- 8 Timesheet helps in identifying the availability of employees assigned to a project, making it easy to distribute the workload among employees.
- 8 Timesheet enables managers to monitor progress and anticipate delays.
- 8 Timesheet helps managers estimate costs and compare them to the actual costs during execution.

3 Timesheet Generation

8 can automatically generate timesheet for each employee based on their assignments in each timesheet cycle. 8 will carry each employee's planned or allocated time information to the employee's timesheet screen so that the employee doesn't need to cross check the information before he or she fills in the actual time spent.

Time Cost Category Report

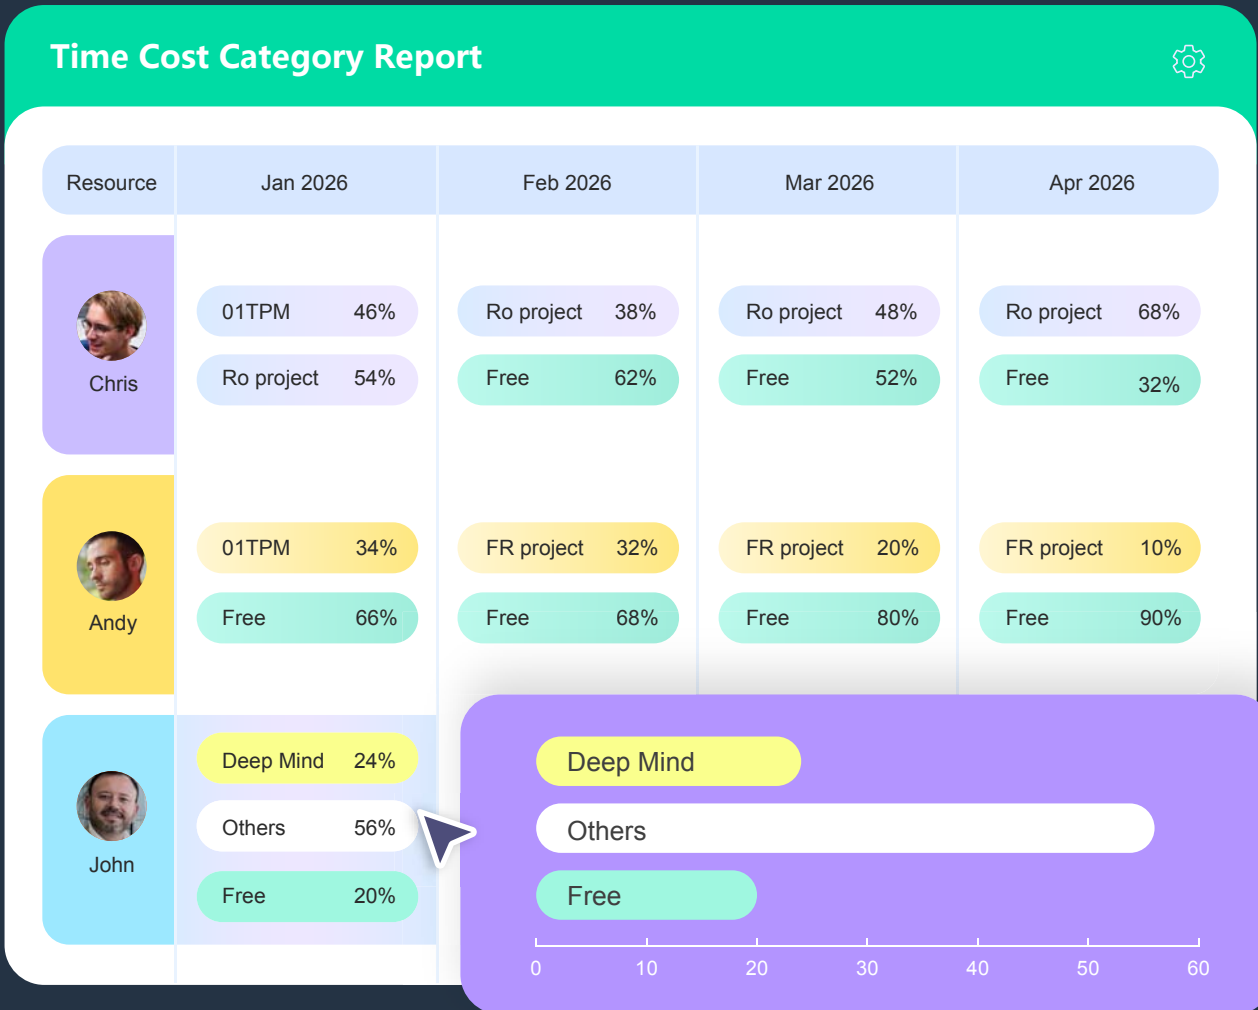

Allocation	Allocation Details	Work Category	Sun	Mon	Tus	Wed	Thu	Fri	Sat	Total	
Project for ABC			0.0	9.0	9.0	8.0	10.0	8.0	0.0	44.0	
Project Work		Project Work	<input type="text"/>	0.0	2.0	1.0	2.0	0.0	<input type="text"/>	<input type="text"/>	✗
1:Traning		Project Work	<input type="text"/>	2.0	2.0	2.0	3.5	2.5	<input type="text"/>	<input type="text"/>	✗

2:B											✗

Total Regular vs Overtime Hours

8 Timesheet supports the approval process that includes steps to formally approve work from different levels of the project and/or organization. The work can include project and/or non-project work that needs a series of approvals from different teams and/or departments.

4 Resource Calendar

Because different types of resources may have different working hours (e.g., Office Staff 09:00 to 18:00, Data Centre Operator day & night shifts, Mainframe Computer 24 hours a day except Sunday), 8 allows each resource type, resource group and even each individual resource to have its own calendar to define its working hours, working days and holidays.

Resource Calendar is the key feature that allows managing different types of resources across different countries which have different working hours and holidays.

5 Timesheet Reports

8 provides various reports to show time spent by resource or job level for the following over different periods of time:

- Department
- Project
- Work category
- Charge account

All real-time reports can be exported to Excel or PDF for filing and mailing.

Time Cost Category Report

Resource/Work Category	Total		Jan 2023		Feb 2023		Mar 2023	
	Hour	Days	Hour	Days	Hour	Days	Hour	Days
Andy Adm00	44.0	5.5						
Andy PRJ 00	1.0	0.1						
PRJ 01	132.0/236.0	16.5/29.0						
Bob PRJ 02	44.0	5.5						
Total	221.0	27.6						

Time Cost Category Report

Adm00 PRJ 00 PRJ 01 PRJ 02

8 also allows the user to produce multidimensional reports for analysis of things such as below:

- Time spent by key resources on multiple projects
- Time spent by key resources on multiple work categories
- Project effort by job level and subdivided by resource
- Work category effort by job level and subdivided by resource

The interactive report generation capability provided by 8 helps the manager to conduct intelligent analysis of how her resources spent their time and devise better methods of managing her valuable resources.

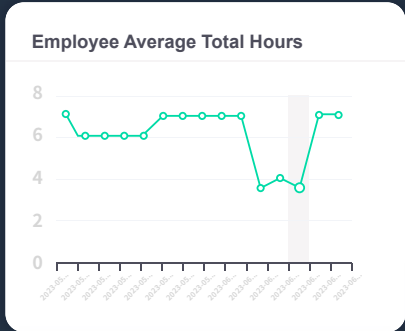

6 Mobile Timesheet

Control Working Hours

Timesheet increases your awareness of team capacity and improves profitability for your business.
